

GILPIN GRASSLANDS SAGA: 2017 & 2018

This version of the Gilpin Saga is “Déjà Vu all over again” (as per baseball great Yogi Berra’s quotation.)

Same range cow damage.

Same cattle contaminated streams.

Same lack of oversight by Range Branch and Grazing Tenure Holder, allowing cattle all over the area for extended periods.

See our drone and land tour in the youtube video below. If your devices and download speed allow, the video is viewable in HD up to 1920x1080.

Our earlier articles and videos on the Gilpin are available below:

LOST LAKE, GILPIN GRASSLANDS
& a RANDOM ACT of
PUBLIC GOOD

<http://www.boundaryalliance.org/lostlake.pdf>

A FEW PICS FOLLOW:

1

early season comparison, Nature Trust protected area on right, thanks to volunteers

2 early season cattle damage just outside of protected area.

3 protected area next to cattle damage in pic 2.

4 protected area allows vegetation to thrive.

5 early season, cattle damage already showing outside fence.

6 drone view comparison of protected and cattle grazed areas..

CATTLE GRAZING on PUBLIC LANDS comes at great public cost, economically and ecologically.

Those costs and growing reports of health costs will be the subject of upcoming articles.
